

RELEASE NOTES

What's New

Neo version 1.03 sp7

Enhancements

Colour Scheme

- New items:

Item	Definition
Cross	Color for crossings. This setting changes the color of the Priority Crossing and Trade Report dialog boxes. <i>IOS Plus only.</i>
Cross Short	Color for short sold crossings. This setting changes the color of the Priority Crossing and Trade Report dialog boxes. <i>IOS Plus only.</i>
Short Sell	This setting changes the color of the Order Entry dialog boxes, Short Sell button, and B/S and Side columns. The LastAct column in the Operator Pad command also uses this setting for the Create action. <i>IOS Plus only.</i>

Note: These settings require a specific version of IOS Plus to use.

RELEASE NOTES

Bugs Fixed

Neo version 1.03 sp7

Bugs Fixed

IOS Plus

This version of IRESS contains a bug fix for IRESS clients who use the IOS Plus product:

- In Depth, hotkeys for OTW now work.
- In Course of Sales, the **IOS Plus Cancel Trade** option now displays correctly when added to the right-click context menu.
- Pressing **Backspace** in OTS was not deleting the previous character.

IPS

This version of IRESS contains a bug fix for IRESS clients who use the IPS product:

- Generating Crystal Reports no longer causes IRESS to close.

Depth

- Requesting securities now works correctly when security guessing is turned off.
